DETAILED ACTION

1. Applicant's election with traverse of Group I (Claims 1-4) in Paper No. 8 is acknowledged and the examiner would answer the traverse in the first office action on the merit. However, upon reevaluation of the restriction requirement, it is found that the claims in group I and group II were improperly grouped. To clarify the previous restriction, the claims in group I and group II are properly regrouped for the restriction, which are stated below.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9, drawn to a bioassay plate having silver ions immobilized thereon.

Group II, claim(s) 10-14, drawn to a method of making a multi-well plate having silver ions immobilized thereon.

Group III, claim(s) 15, is drawn to a method for detecting an antigen.

Group IV, claim(s) 16, is drawn to a method for detecting a first antibody.

Group V, claim(s) 17-19, is drawn to a kit for the detection of a first antibody.

Group VI, claim(s) 20-22, is drawn to a kit for the detection an antigen.

Group VII, claim(s) 23, is drawn to an apparatus for activating microplates.

The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Art Unit: 1639

The special technical feature of this invention is an immobilized silver ion on a support.

However, Siiman et al. (1996) disclose the special technical feature of immobilizing silver ion on a substrate (Abstract).

Therefore, groups I-VII are not so linked by the same or a corresponding special technical feature as to form a single inventive concept.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
